Hello,

I'm Aniruddha Kudalkar

AI Engineer, Corporate Trainer, Consultant

AI engineer, Trainer, and Solutions Architect with decades of experience. I've made a real impact on hundreds of professionals, students, and enthusiasts through comprehensive AI training programs. My experience ranges from bootcamps and startup acceleration to corporate training, and I'm committed to delivering results.

Experience

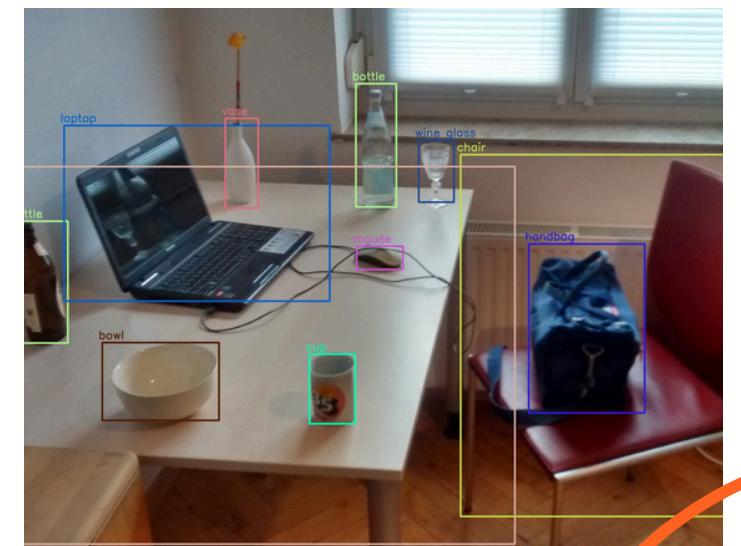

13+ Years Of Freelancing

AI Engineer

Freelance AI engineer crafting tailored solutions for 3 companies. I partner closely with clients, from initial consultation and problem definition to ongoing model maintenance and refinement. My expertise spans the entire AI lifecycle, from data acquisition and rigorous data processing to seamless model deployment and continuous improvement. Delivering high-quality, impactful AI products that exceed expectations.

Corporate Trainer

Empowering professionals at all levels with practical AI training designed to accelerate their careers. Specializing in Python programming for AI, classical Machine Learning using Scikit-learn, cutting-edge Deep Learning with PyTorch and TensorFlow, the exciting field of Generative AI, and efficient model deployment strategies. My training emphasizes hands-on exercises, real-world case studies, and a framework-first approach, ensuring participants gain immediately applicable skills.

Achievements

500+ Candidates Trained

30+ Bootcamps

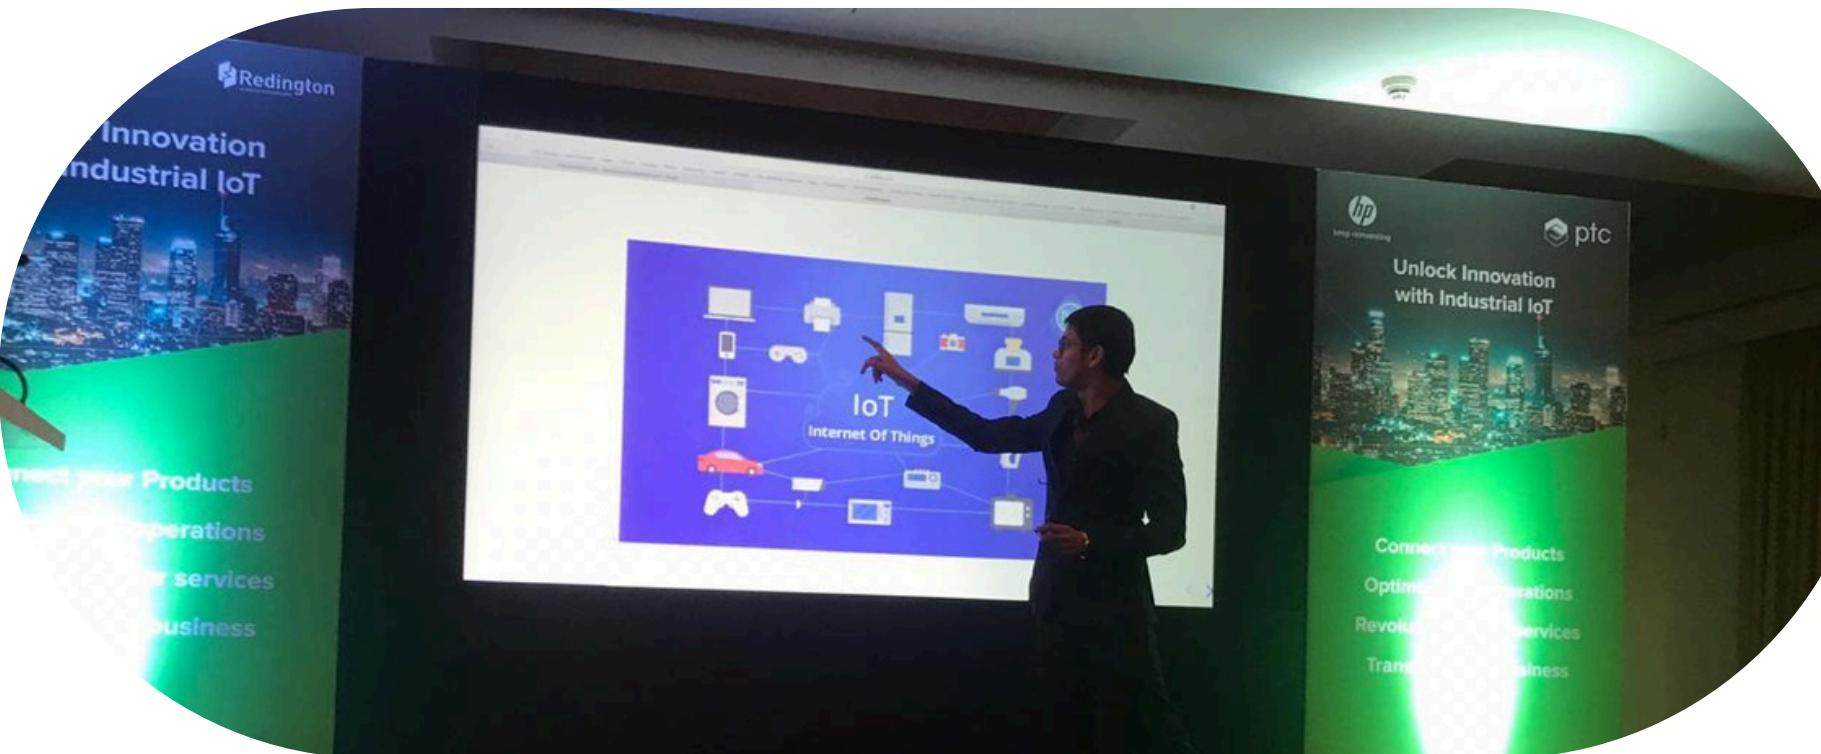

20+ Corporate Trainings

Almost 95% satisfaction rate across all batches demonstrates the effectiveness of the training in terms of content, delivery, approach, subject knowledge, materials, and support. Because building confidence in AI implementation is a core goal, both technical and non-technical participants reported the sessions were valuable for career growth.

Corporate Trainings

Empowering organizations to seamlessly integrate AI into their products and services through tailored training programs. Having served multiple clients, I'm experienced in addressing diverse learning needs. From strategic workshops with CXOs and top management focused on AI strategy and ROI, to hands-on technical training for new hires covering Python, Machine Learning, Deep Learning, and model deployment, I equip diverse teams with the specific AI skills they need for success.

AI Bootcamps

AI bootcamps provide hands-on experience for a range of learners, from recent graduates to seasoned professionals. Covering the complete AI lifecycle, from data collection and manipulation to model training and deployment, these bootcamps equip you with practical skills for real-world applications. A significant portion of attendees are working professionals looking to upskill or transition into AI.

Modular Sessions

Dive deep into the world of AI with my modular training sessions, designed to empower candidates with practical skills. Explore key areas like Python programming for AI development, Machine Learning fundamentals, Deep Learning techniques, the exciting realm of Generative AI, and the power of Large Language Models (LLMs). These hands-on sessions focus on real-world applications, ensuring participants gain immediately applicable expertise.
