Experience

Freelance AI Engineer

Freelance AI engineer crafting tailored solutions for 3+ companies. I partner closely with clients, from initial consultation and problem definition to ongoing model maintenance and refinement. My expertise spans the entire AI lifecycle, from data acquisition and rigorous data processing to seamless model deployment and continuous improvement. Delivering high-quality, impactful AI products that exceed expectations.

AI Bootcamps

100+ AI bootcamps provide hands-on experience for a range of learners, from recent graduates to seasoned professionals. Covering the complete AI lifecycle, from data collection and manipulation to model training and deployment, these bootcamps equip you with practical skills for real-world applications. A significant portion of attendees are working professionals looking to upskill or transition into AI.
